

Started in early 2008, Auslogics Software Pty Ltd has been on a mission to improve the speed and stability of Microsoft Windows on personal computers.

Over the years, our flagship product, Auslogics BoostSpeed, has steadily gained market share by combining a powerful suite of system optimization, maintenance, cleanup, and repair tools with an intuitive, easy-to-use interface.

Recognizing that freeware plays an essential role in people's lives, we have also developed a range of complimentary tools—most notably, Auslogics Disk Defrag, Auslogics Driver Updater, and Auslogics Anti-Malware, celebrated for their robust features and intuitive design.

Today, with over 16 years of industry leadership, Auslogics is trusted by millions of users worldwide.

Our software solutions have collectively been downloaded over 50 million times and have earned numerous 5-star awards from industry experts. This continued growth and recognition affirms our status as a well-recognized and respected brand in the online world, as we relentlessly work to keep PCs running at their best.
